Brighten Up

"Brighten Up" time is here—the time to clean up about the house, renovate, and make the old things look neat and clean again. We can help you in the work with our line of **SHERWIN-WILLIAMS PAINTS AND VARNISHES.**

It is really surprising what a little paint or varnish will do toward brightening up dingy surroundings. Take *The S-W. Family Paint*, for instance. This is a linseed oil paint specially prepared for home decorating and painting. With it any one can renew the appearance of a hundred little things that now look worn and old. It dries with a good gloss and will stand scrubbing with soap and water. Comes in 26 attractive shades.

The S-W. Floorlac is another splendid household brightener. It is a stain and varnish combined and can be used on old or new woods equally well. Imitates the natural woods and gives a most pleasing effect.

These offer a few hints for you. Come in and have a "Brighten Up" talk with us and learn more about how we can help you in your Fall cleaning. Our line has a paint or varnish for every purpose.

Remember, we sell

Spring Party

A very pretty "spring party" was given by Mesdames Kammerer and Kennedy Thursday evening at the home of the latter.

Beginning with the invitations, which were in rhyme and very "flowery," to the close of the evening everything was suggestive of spring and the Easter tide.

Bowls of roses and jars of purple iris lent both beauty and fragrance to the rooms, while streamers hung with painted Easter eggs, added a touch of novelty to the decorations.

A very "springy" program was given by several of the musical guests and a couple of spring poems were read. Among the songs were, "The Year's at the Spring," "The Flowers That Bloom in the Spring," "The Swallows," and Mendelssohn's "Spring Song."

After partners had been found by matching parts of paper eggs, the gentlemen selected tissue paper and decorated some paper hat "shapes." When completed, the ladies passed in review before judges and prizes were awarded, the highest going to Mrs. Ralph Hyde and Mr. Alison. The prizes were a dainty boudoir cap and a shaving towel.

Boston Rook was played, one of the awards for which was an Easter lily in bud. Mrs. Kammerer played several selections during the games. Delicious refreshments were served, in which, too, the prevailing idea appeared in the baskets of eggs and chicks adorning each table and in a very pretty egg and lettuce salad.

It was one of the pretty parties of the winter, of which there have been many.

Local and Personal

Ask merchants for contest coupons.

The Ralston Alison family spent Saturday and Sunday at Evergreen with Mr. and Mrs. C. W. Stevens.

J. F. Duncan and E. R. Kennedy went to Pacific Grove Sunday to see R. K. Thomas and report him improving steadily.

Ben Rodeck returned Monday from Los Angeles, where he had spent his spring vacation with Mr. and Mrs. Antrim.

Mr. and Mrs. C. H. Whitman, Mrs. Ethel Davis and daughter, Genevieve, and Dwight Van Arsdell motored to Selma Friday to visit Miss Charlotte Davis.

Mrs. H. W. Higbie made a trip from New York to Porto Rico the last of March and is again back at her work in "little old New York."

Mr. and Mrs. J. L. Hagelin and Miss Anna, and Mr. and Mrs. Olaf Strom left Tuesday for a visit with friends at Kingsburg and Ridley, making the trip by auto.

Mrs. F. G. Wells entertained at a dinner party Tuesday evening, covers being laid for twelve. The evening was passed very pleasantly with cards, music and story telling.

Miss Emma Swope and Virginia Isham went over to Carmel Thursday and remained until Saturday the guests of Mr. and Mrs. J. C. Ainsley. The party all returned by auto.

Mrs. Susan Castle went to San Francisco Tuesday to have an operation for cataract performed on her left eye. She had the same operation performed on her right eye last fall and was delighted with the result.

The wide circle of her friends will regret to learn that "Auntie" Poor is ill, being confined to her bed. She has received word that her sisters in Illinois may come out here, which would mean very much to her.

Arrangements are under way in preparation for the Pomona Grange of Santa Clara county which meets at Campbell this year on May 13. The various committees are busy and give promise of a most interesting program.

Mrs. A. P. Merrill was hostess Saturday afternoon to a number of her lady friends at a thimble bee. During the afternoon Mrs. Merrill read an original poem of Mrs. Jones' on "Martha Washington." It was also Elsie Merrill's birthday and the little people had a birthday table, with six candles set in apple holders.

An interesting entertainment has been planned for this week at the home of Mrs. H. A. Watrous, Los Gatos Road, Saturday afternoon. Mrs. K. F. M. Cleaves, of Hollywood, will render a varied program of readings and songs. The members of Pundita Circle and others will assist the hostess in making the affair pleasant for all who attend.

There was quite a turn out for the grammar school election Friday afternoon, 266 votes being polled. Of these 164 were for Mrs. Meda L. Waite, and 102 for E. E. Phelps. Only 52 votes were cast for the High School trustees, as very few were aware that there was any opposition, but when the count was made it disclosed that E. Fritz had received 15 votes.

Improvement Club Meeting

The regular meeting of Improvement Club was called to order on Thursday evening, April 6 at 8 o'clock. The report of Standing Committees was called with the following result:

Committee on
Public Improvement—No report.
Roads & Highways—
Advertising—
Lighting—
Membership & Finance—
Fire—

Special Committees
Rural Delivery
Committee of 3 on School Buildings

Mr. Alison read a report showing that the Committee with the school board had been doing a lot of hard work. They had held 12 meetings since the last club meeting. Had met with several architects and discussed plans as carefully as possible, and that Mr. Wolf was present with plans and estimates to present before the meeting—and answer all questions.

Mr. Wolf was then introduced. Two slightly different plans providing 6 class rooms and many other details to cost \$12,000 to \$16,000, were presented and fully discussed. Mr. Wolf also exhibited a working model of a new ventilating system which is giving much satisfaction where tried—the demonstration was very interesting.

General discussion followed and on motion of Miss Lewis it was agreed that the Committee of 3 and the trustees perfect the plan and bring it before a mass meeting which they were to call at an early date.

Mr. Rodeck reported for the Light Committee that the contract had been signed and that the lights would be put in as soon as the Company could get to it.

On motion the Finance Committee and Treasurer were appointed to collect the subscriptions to light fund.

It is suggested that subscribers call at the bank and pay their subscription to treasurer Roy Archibald as soon as convenient. It should be borne in mind that the Committee and Treasurer are acting without compensation in this matter and should be caused as little trouble as possible.

Several suggestions were made for various improvements in the town and referred to committees. All residents were urged to clean the street in front of their property and clear away rubbish, which will add to the appearance of our town.

Mr. Berry reported seeing the architect of the old school building—and presented plans for building 2 rooms on north end and repairing old building at a cost of \$2200.

The President made some stirring remarks about the duties of committees and members.

That the work could not all be done by a few. That he had personally requested the various committees to have reports ready and be present with them at this meeting and behold the result.

If the members and committees will not take hold and do their part promptly what can be expected? He could not do it all. He commended those who had done their part—but desired a more united action by all—and deplored the fact that so many found other places so much more attractive on club meeting night. With so much business to transact tonight, their presence was especially required.

Hip, Hip, Hooray

Who said old Campbell can't come back? A number of our old citizens can remember a few years back when Campbell was one of the best advertised little towns throughout the Santa Clara Valley, and a well organized base ball club with a lot of speed and "pep" was responsible for this notoriety.

Campbell will be in the limelight again this year from what we can observe and if rumors are correct we will create an impression in more than one of our neighboring towns before the summer comes to a close. Glenwood, Mayfield, Irvington, Milpitas, Agnew, Hollister and various other towns have indicated a desire to cavort around the field in competition with our boys, and, by heck, guess we will be able to take them on.

The management has requested the editor to take care of their funds, in other words, we will be the Treasury Department. However, we have not as yet come into the possession of anything to treasure. It goes without saying that we want a good ball club by all means, and we hope we are not imposing on your good nature, when, in behalf of the Campbell Athletic Club, we ask you to subscribe toward the outfitting of same. Anything will be acceptable from 5 cents to a dollar. Who will be the first? All contributions will be thankfully received.

Some Dry Goods News

If some of the ladies could help unpack that box of new goods—unpacking dry goods is always interesting—they would be sure to see some things they'd want.

By the way, there is something new in dry goods beside new styles and pretty patterns, and that is—**prices.** Even gingham are up—think of that! Gingham will be more popular now; the higher prices will lend them more dignity—one doesn't care to wear anything cheap, you know.

And then there's pins—just common Eagle pins are to be **ten cents.** One doesn't need to be so particular about putting pins where they won't show—you see they have become valuable—almost a form of jewelry.

But to return to that box of new goods: First, there is a piece of white cotton Poplin to sell at 25c a yard. Everyone knows the value of cotton Poplin for waists, skirts, women's and children's dresses, and the like. And then there are several pretty patterns of gingham—you'll see them in the window. In the staples there are such things as "self-shank" Pearl Buttons, Lace in 5 and 10c patterns, Tatting Shuttles, Embroidery, Black Sateen, Lawn, Long Cloth, Featherstitch Braid, Crochet Cotton, Silko, etc.

If you tat you will be interested in those shuttles with removable "easy-wind" center.

COULDN'T KILL MULE

"OLD TOBE" NONE THE WORSE
FOR LONG IMMERSION.

Incident of the Civil War Shows How
Hard It Is to Separate Govern-
ment Pack Animal From
Uncle Sam's Rations.

Z. P. Hotchkiss, adjutant of Phil Sheridan post G. A. R. of Oak Park, Ill., tells the following experience with a government mule. As an army telegrapher Mr. Hotchkiss was attached to the staff of General Canby in the final Mobile campaign.

"The entire outfit for the construction of the army telegraph lines," says Mr. Hotchkiss, "was carried on the backs of forty pack mules. A coil of half a mile of wire hung upon each side of the saddle.

"There were six young operators, one from each corps, mounted on horses. To these boys had been entrusted the government cipher and knowledge of the advance movement of the troops. These secrets were safe, as none of the young fellows ever betrayed a trust.

"For the Mobile campaign the mules were drilled in the streets of New Orleans to follow the lead of the muleteer or the horse of the chief operator.

"One day, while following in the rear of the army up the peninsula from Dauphin Island, the entire train was trailing along in the rear of the chief operator, who knew nothing about ocean tides. The reel mule, 'Old Tobe,' from whose back was uncoiled the wire, was in advance and followed his leader into an arm of the Gulf of Mexico. The operator's horse was soon beyond his depth and was swimming for shoal water when it was seen that 'Old Tobe' had sunk beneath his heavy load. The muleteer swam his horse to where the reel mule had gone down, and after diving twice, came up gasping for breath.

"The fool critter is walking toward the Spanish fort," he said, 'but I'll get him this time, sure.' He dove again, and with his clasp knife cut the belly-band of the submerged mule and rid the animal of his load. 'Old Tobe' floated to the surface, shook the water from his ears, was towed ashore, pumped out, and a few hours later was again making the march for Fish River. Save for dragging a little, he showed little sign of his experience; but he had been under water long enough to have killed anything but a government mule."

Some 200 army operators, who, though many of their number were killed or taken prisoners of war, are ineligible to a government pension, are the recipients of private pensions in their old age from their comrade, Andrew Carnegie.

Heredity and Eugenics.

Only a misguided enthusiast, says the Journal of the American Medical Association would venture to make great claims at the present time for the possible future usefulness of applied eugenics. The doctrine of heredity on which the new postulates are based must first be subjected to critical investigation. The limitations of the practical aspects of eugenics must be clearly formulated and emphasized. It is well enough to maintain in a general way that vitality is partly inherited and partly acquired, and that "a sound physical and mental inheritance is a greater asset than the inheritance of extraneous advantages like wealth." Many individuals, however, have assumed that the new science is primarily intended to foster a scheme of general governmental interference with marriage. As a matter of fact, the most earnest students of the subject have at best hoped to promote the gradual establishment of standards in public opinion.

Now We Have It.

The earth passed between the planet Saturn and the sun January 4. It passed between Neptune and the sun January 7. There being no planets in position to force the earth out from the sun and cause cold weather after February 16 these three planets will repel the earth toward the sun, or rather against the sun's repulsion, from February 16 to April 26, which will cause spring to begin practically about February 16, and will cause warmer and drier weather than usual from February 16 to April 26, 1916.

During that warm period the principal cool changes of weather will occur just after the moon or any planets pass between the earth and other planets or visible stars near the eclipse. When precipitation occurs it will be near the dates of these planetary, lunar and stellar conjunctions.—D. N. Grover, in Baltimore Sun.

Birds' Nests Cause Fire.

Birds' nests under the roof of a two-story corrugated iron structure at Twentieth street and Sedgley avenue, Philadelphia, caused a fire when they became ignited by sparks from hot sand in a mixer. The roof of the building was damaged about \$200.

Nests are frequently found under the roof and they are destroyed every few days in order to prevent a fire. They were cleaned away recently, but the birds quickly rebuilt them.

CALIFORNIA'S
CYPRESS GROVE

THE FOREST OF CYPRESS

THERE is a lone tree in Lombardy that accomplished what a million men suffered and slaved to do. It stood in the path of the great Simplon road, and at the sight of its stately grace Napoleon turned the road from a straight line, that its beauty might remain man's heritage. It is the cypress of Somma, and stands as a monument to the greatness of one man and a lesson to those who would sacrifice beauty to the god of gain, says Mark Daniels, former superintendent of national parks, in American Forestry.

That Napoleons are scarce we know, but are there so few who have not even enough of his vision to see and appreciate the glory of a magnificent forest or the eternal miracle of a waterfall that they will continue to squander these birthrights by indiscriminately hewing down the forests and damming up the streams?

There stands not one cypress, but a grove of them, of surpassing beauty, on our western coast. True, they are not of that tall, stately variety, with formal, architectural lines; they are, on the contrary, the exact or complete reverse, for they are gnarled and twisted; but they are beautiful in their setting as anything that the eyes of man may rest upon. There is but a comparatively small area where they still grow, and they are as distinct among the other conifers of their region as are the Sequoia Gigantea amongst the conifers of the Sierra Nevada. In fact, in many respects they remind one of the "big trees," as they are called; for they have a most distinct individuality which makes them stand out alone.

They are to be found only in a certain locality, and their age is much disputed. I have heard this estimated to be from 100 to 7,000 years, and there seems to be no reconciling the various contestants. However, the question whether they have seen one or twenty generations of time would seem to be of small moment, in the light of the fact that they are struggling through the last few years of one generation of American tourists. But they seem to stand the storm of "oh's" and "ah's" with the same fortitude with which they resist the gales and blasts of that beloved seacoast on the very edge of which they spread their spiraled roots. Growing down to the actual verge of the sea, with bare branches stretched out like arms toward the land of the setting sun, the question of whether they are the vanguard of an ancient western growth or the stragglers of the great eastern forests that were cut off by the Pacific is almost always the first subject of conjecture on the part of the tourist.

Picturesque Shore Line.

About 125 miles down the coast from San Francisco lies the Bay of Monterey, at the southern extremity of which the first cypress trees are to be found. These trees possess more the character of the cedar of Lebanon than they do of any variety of cypress, and are known to those who burden their minds with etymological detail as the cupressus macrocarpa. From this point, which is known as the Del Monte peninsula, and which forms the southern shores of this wonderful sapphire bay, picturesque groves and occasional isolated specimens are dotted along the coast for some twenty-odd miles to Lobos point.

Here, again, the old adage, "It never rains but it pours," is borne out by the riot of exquisite beauty which confronts the observer on every side. Nature seems to have concentrated on this locality in the development of extremes of picturesqueness and intensity of color. The shore line is broken and jagged, with here and there a stretch of ivory-colored sand beach, terminated and broken by precipitous cliffs, against which the indigo sea hurls its pearls and sheets of water that are a pale jade green against the lemon-colored horizon and the setting sun. A motor trip along the coast line gives one the effect of a kaleidoscopic change of coloring, the rapid succession of which should vary with the speed of the motor were it not for the unholy combination of the modern six-cylinder machine with the freedom granted the tourist by the own-

ers of the property. As it is, however, conditions would appear to be reversed; for, with the average driver, the speed along these wonderful drives is such that the constant prayer of the tourist is that some accident may happen which will allow him sufficient time to fix upon his retina one permanent picture of the exquisite color harmonies of the sapphire bay, the ivory-colored beach line, the silver-gray trunks of the trees, and the deep blue and bright yellow-green of their tops.

Seventeen-Mile Drive.

From the hotel at Del Monte a wonderful drive, known as the Seventeen-Mile Drive, follows the coast line past the historic old buildings of Monterey, skirting a mission wall and along the sandy beach past homes of innumerable sea fowl, and plunges into a forest of pines that forms the background to the first grove of cypress trees. From there the road winds in and out amongst the spectral trunks, giving a glimpse here and there of the blue horizon and jagged points of promontories, burying itself now and then in the dark and gloomy shade where the growth is dense.

About four miles beyond the first grove of cypress trees is the famous Midway point, which, until the advent of a fleeting exposition, was the most photographed tourist lure on the Pacific coast. It comprises a rock promontory that projects out into the sea, with its toes lapped by the gentle waves of the Pacific, whose ardor has been tempered by the reefs and submerged rocks farther out at sea, upon whose treacherous points the coastwise traffic of this district is frequently wrecked. Upon the summit of this point, as if placed there by the playful hand of an imaginative painter, grows a lone cypress tree, the roots of which are almost entirely exposed to the air. The top of this tree, however, is brilliant green, and when silhouetted against the sky of the setting sun is indeed a sight to behold. Farther along the coast the drive widens along the shores of Pebble beach, past the homes of men whose millions are in the banks and others whose fortunes are still in their heads, to Arrowhead point, and beyond to the famous mission that marks the mouth of the Carmel valley. Beyond the point where the Carmel river empties into the sea is Lobos point, and the quaintest and most curious cannery on this coast. At the latter-named point of interest they preserve the toothsome abalone, a sea product that is peculiarly indigenous to this locality.

Up to Date.

"It's a real joy after all—this up-to-date apartment-house living," said the bride of a year or two to the friend who was paying a duty call. "The sherbet you're eating is a month old."

The visitor unconsciously delayed an ascending spoonful. "Don't be worried," smiled the bride, "the ice is all right. I've kept them longer than that. You see, my last afternoon 'at-home' came on a rainy day, and I had a distressing number of ices left over. Now, if that had happened in a house with only an ice-chest, all of the refreshments would have gone to waste. The caterer wouldn't have taken any of them back. But, you see, every apartment in this house has a refrigerating plant. You can keep things to eat as long as a cold storage warehouse. It's very nice."

"Yes, it is," said the bride's caller. "It's very nice sherbet, indeed."

Useless Fretting.

"My nephew, Elbert Petty, puts in the most of his time at worrying about what does not greatly concern him," confessed Gaunt N. Grimm. "Just now he is considerably exercised over the religious beliefs of Christopher Columbus. This is foolishness, in my opinion, for there is nothing he can do about it, even if he convicts Columbus of being entirely in error. And it is especially futile when right here in his midst, so to say, is the question of world disarmament, about which he can do fully as much anybody else."—Kansas City Star.

THE SANDMAN
IN STORY
By Mrs. F.A. WALKER
Copyright, 1916, by F.A. Walker
Reprinted by permission of the author

MRS. ROBIN REDBREAST.

Mrs. Robin Redbreast was discouraged ever since they came north in the early spring. Mr. Robin Redbreast had found fault with her. First it was the place where the nest was built. Robin told her they could have a nest in the apple tree or in the old elm at the end of the lane, and Mrs. Robin had selected the apple tree because she thought the apples would be near at hand when she was on the nest, but after they were settled Robin told her if they had gone to the elm they would not have the sparrows bothering them.

Poor Mrs. Redbreast said nothing, but she sighed as she put the children to bed and wondered what had come over Robin.

"These children should be taught to fly," said Robin one morning. "They should be learning to find worms for themselves. If you were any sort of a mother you would have begun some days ago."

"Why, Robin," replied his wife, "they are only babies; they would be sure to fall off the limb the first try. I will teach them in a short time, but they are not strong enough yet."

Mrs. Redbreast hurried with her work that morning and then she put the children close together in the nest.

The Nest Was Empty.

"Don't you move," she told them. "I am going to market to get something nice for dinner."

"Give me the very tenderest worms you have," she said to the market man, "and I want them fat, too."

Then Mrs. Redbreast went home by the way of the cherry tree and picked a basket full of the most delicious cherries she could find. "Then," she said as she hurried home, "if this dinner doesn't sweeten his temper nothing will."

"What did you bring?" asked the little Redbreasts. "Can we have some?"

"You keep quiet," said their mother, "you can have some when dinner is ready and not before."

Mrs. Redbreast arranged her dinner and stood and admired the effect. "It looks good enough to eat," she said. "I do not see where Robin can be."

Robin appeared at that minute and looked around, hoping to catch her with the dinner unprepared. He had eaten some crumbs and grain he found in the yard and was not very hungry, therefore he felt in the mood to find fault with the best dinner that could be served.

Mrs. Redbreast watched him with anxious eyes. "Are these not nice, fat worms," she asked after waiting a minute.

"Oh, yes, they are fat," answered Mr. Robin, "but will you never learn that the biggest are not always the best? My mother used to select the best worms I ever ate. I wish you would begin to get like her, but I do not suppose you ever will."

"Why, Robin, you told me that you liked the fattest worms I could find the other day," said Mrs. Redbreast, wiping away a tear that rolled down her cheek. "You said the ones I had last week were too lean, but I am sure you will find the cherries nice," she added, without waiting for him to reply.

"They are too ripe," said Robin, hopping out to the end of the limb. "I might just as well not come home to dinner; there is never anything fit to eat."

Robin waited around a few minutes, but his wife did not answer him or speak to him again, and she gave the little Redbreasts their dinner and then began to clear the table, and Robin, seeing that there was no use trying to quarrel with her, flew away.

It took Mrs. Robin all the rest of the day to accomplish what she set out to do, and when night came she had all the little Redbreasts in a nest two limbs above their own, and she told them to go to sleep and not dare to peep.

Then Mrs. Redbreast began to watch for Robin. She had not long to wait, for he flew home early to get his supper. Having had his dinner early made him very hungry.

He threw his cap into the nest and looked about, but instead of the nice supper he had expected to find the

nest was empty, not only of food, but the whole family was gone.

Robin hopped around on the limb, looking behind the leaves, and then he looked on the ground, for he thought the little ones must have fallen out of the nest and their mother was watching over them, but no, they were nowhere in sight. Robin was hungry, as I have said, and there was no supper, and he sat on the edge of the empty nest, looking very forlorn and feeling very unhappy.

Mrs. Redbreast, of course, was watching him, and when she thought he was punished enough she flew down. Robin was so glad to see her that he forgot to ask her where she had been. He flew right over beside her and pecked her bill, which, of course, was a kiss. "Where are the children?" he asked; "I miss their chatter."

"Oh! I thought they were old enough to have a nest by themselves," said the wise Mrs. Redbreast, "and they are asleep in the bough above. Now I must set your supper. I am a little late. What will you have?"

"Anything you have," replied Robin. "You need not fret about keeping me waiting, for I am sure I was a little late getting home."

Mrs. Redbreast did not reply, but she prepared the nicest supper she could and they sat down to it.

"You certainly can make nice biscuits," said Robin, helping himself to the third, "and as for that dinner this noon, I guess I was not hungry. My stomach has been a little upset for a few days, because I ate some cherries before they were quite ripe."

"You must be more careful," was all the reply that Mrs. Redbreast made, for she knew that was the best way.

Later, when Robin had settled down, she started to go to the children. "Don't be gone long," said Robin. "I think after all you had better bring them down here and then you won't have to be away so much."

Mrs. Redbreast flew up to the nest. The children were all right, but she sat on the side of the nest for a few minutes waiting for what she knew was sure to come.

"Are you coming down pretty soon," called Robin, flying up to the next limb.

And Mrs. Redbreast knew she had won and that Robin had been brought to realize his fault, and for the rest of the summer there was no more fault-finding.

POULTRY BUSINESS FOR BOYS

Mongrel and Long Toe-Nailed Hens
Are Only Loafers and Eat Profits
—Sell Them Off.

Are you going to wait until you grow up before you go into business? That's a long time to wait.

Why not start now and learn now while mistakes are not as fatal?

Get your father to let you take care of the poultry. If he is the right kind of a father he will be only too glad to let you take hold of the work. And then make a business of them.

First, catch all those mongrel and long toe-nailed hens and give them to the church supper for a stew. They don't lay any eggs. They are only loafers who eat up all the profits which the good hens make for you. No business man would keep a stock of shoes that he couldn't sell at a profit. There is no more reason why you should keep hens around the place that don't pay.

Then fix up the poultry house so that it is dry and clean. No business man would keep his stock in a leaky

Arranging Hen and Eggs.

store. How much more important it is that your poultry be kept clean and dry!

And last, but not least, make some money out of it. Get your father to give you everything you make above what were his last year's profits. You are a stockholder in the company, tell him, and you want your share of the profits. When he sees the fairness of the proposition, he can't very well refuse.

Get into business for yourself this winter—the poultry business. Give your hens comfortable quarters. Feed them right and care for them carefully. And if you don't make a success of them, you aren't the business man we think you are.

If you have any questions to ask, write to James G. Halpin, Madison, secretary Wisconsin Poultry association.

Adroit Answer.

Schoolmistress—Well, Freddie, dear, what did you learn yesterday?

New Boy (after deep thought)—You ought to know—you taught me.—Punch.

berries and Apples—Economy
in the Scheme.

It is often a decided advantage to the housekeeper to make jelly out of a combination of fruits—sometimes because the combined flavor may be preferable to either alone and sometimes because it may be more economical, as, for instance, when she has too little of either fruit to use for this purpose, or, to cite another instance, when she wishes to extend the flavor of some special fruit as quince through a considerable amount of material less highly flavored, as apple. Sometimes, too, there is an advantage in both flavor and color, as when cranberry is combined with mild-flavored apples.

An excellent combination for homemade jelly, according to the home economics experts of the department who have been studying the uses of different fruits, is cranberry with apple. Equal quantities of cranberries and of apples cut up into small pieces should be just covered with water and boiled until the fruit is soft. Strain the juice through cheesecloth. Add to the pulp the same amount of water as at first, boil the pulp a second time, strain as before, and combine the two lots of juice. Add three-fourths as much sugar by measure to the juice, and boil again. The jelly is done when a few drops taken up with a mixing spoon will flake on the spoon as it cools instead of dropping off of it. Pour the jelly into glasses which have just been sterilized in boiling water and thoroughly drained. Seal the glasses in the ordinary way.

The pulp which remains after the juice has been drained off for jelly can be used to make excellent "marmalade," or "fruit cheese," as old-time housekeepers called it. The pulp should be passed through a sieve, an equal weight of sugar added to it, and boiled until it is thick and firm. It must be stirred frequently so that it will not burn. The thick marmalade should be poured into freshly-scalded glasses or jars. While the color is not quite so good as jelly, the flavor is distinctive and good, and such "fruit cheese" is delicious when spread on bread and butter or when used for filling bread-and-butter sandwiches. If less sugar is added in making marmalade, it can be used in place of fresh or dried apples for Brown Betty and similar fruit puddings.

Lentil Loaf.

One quart can tomatoes, or enough to make two cupsful after being boiled down and strained; one-fourth bay leaf, two cloves, one small slice onion, one cupful lentils, two tablespoonfuls butter, salt. Boil the tomatoes with the seasoning and strain. There should be about two cupsful of juice. Add one cupful of lentils, which have been washed and picked over, and the butter and salt. Cook until the lentils are soft and the liquid all absorbed. It is well to do this in a double boiler, though the first part of the cooking may be done with the upper part of the boiler set on the stove instead of over water. Turn out into a square buttered mold. When cold cut into slices. The lentils may be soaked overnight in water, drained, and baked slowly for three or four hours with the tomato juice.

Farmhouse Hash.

Cut cold cooked beef or mutton into small bits, reheat in gravy or in a sauce made of butter, flour and water in which a little beef extract has been dissolved. Season with salt, pepper and grated onion if you choose. Fill a buttered baking dish two-thirds full. Cover the top with seasoned mashed potato made very light and white of an egg beaten to a stiff froth. Bake in a hot oven until the potato is well puffed and brown.

Cranberry Shortcake.

Make a nice biscuit dough and cut it with a round biscuit cutter. When baked split the number you need, butter them and put a tablespoonful of made cranberry sauce on the under half and a tablespoonful of whipped cream. Cover with the other half, put sauce on that and cover with whipped cream. Use the remaining biscuits some other time by warming between two pans.

Poverty Stew.

For a change I peel and cut my turnips in small squares, quarter the potatoes and take one large onion cut up small, place them all in the kettle together and boil until soft and potatoes mealy. Add butter size of egg, salt and pepper to taste, and you have a stew that tastes good when you are hungry. Try and see.—Exchange.

Gruel for Dyspeptics.

Soak a handful of oatmeal over night in water in order that the acid gases which oatmeal contains may be withdrawn; pour off the water and add a pint of fresh; stir it well, add salt and boil one and one-half hours.

Cornmeal Gruel.

Two tablespoonfuls cornmeal, one-quarter teaspoonful salt, one-half cupful milk, two cupfuls boiling water; mix cornmeal, salt and milk, add boiling water and cook in double boiler two hours.

CAP and BELLS

NOT HARRISON, BUT M'KINLEY

Old Lady, Who Was Always Getting Names Confused, Invited Bill to Come Up by Back Stairs.

His mother lived in an apartment house in the East end. He told her he would send out a man from the shops where he was manager to move her furniture from one room to another, and from another room to one, a little pleasure the old lady allowed herself two or three times a year.

"I'll have him get here about ten o'clock, mother, tomorrow morning. You watch out your window for him, and show him how to get up here—he'll be a little timid about coming into this part of town. You'll know him when you see him—a big, tall, rough-looking fellow. His name is Ben Harrison."

The next morning about ten the old lady looked out her front window, and saw a man standing in the street, gazing up at the apartment house. She threw up the window.

"Are you Ben Harrison?" she called. And the man, who wasn't Ben Harrison, but a slate roofer, and who thought somebody was trying to kid him, replied, "No, ma'am, I'm Bill McKinley."

"Oh dear, yes!" cried the old lady. "I'm always getting names wrong! Just go round the side, Mr. McKinley, and come up the back stairs."—Cleveland Leader.

Same Old World.

"Then you can decipher these cuneiform characters, professor?"

"Oh, yes."

"How interesting. And what do these tablets say?"

"Well, this one speaks of a Chaldean who absconded with 30,000 clam shells. Here's an elopement in Assyrian high life, an account of grafting in office, and a king declares war."

"Um. Reads exactly like a front page of today."

Yea, Verily.

Blinks—What's the matter, old boy? I haven't seen you at the club since your wife got a divorce.

Jinks—Oh, you'll see me there before long. I'm engaged to be married again.

A Vague Theory.

"What is this rice powder doing on your overcoat?"

"Beats me. I've been in a lot of offices today. Must have put that overcoat down on a powder puff some where."

His Misery.

"I don't see why you're so miserable. You've got everything to make you happy."

"Yes, I know I've got everything except the joy of wanting something I can't get."

HIS CHANCE.

Lulu—Why ain't you married, Mr. Phatt?

Mr. Phatt—Nobody wants me, I guess.

Lulu—I guess you never asked my Aunt Priscilla; 'cause I'm sure she'd take anybody.

A Fizzle.

"My speech fell flat."

"You told me you had rehearsed it until you could say it backward or forward."

"I had. But I started it backward and couldn't switch."

Not Greatly Affected.

"The doctor says these clothes will ruin my health."

"What of it, my dear?"

"I didn't suppose the old fogey ever noticed the styles."

STOP! CALOMEL IS QUICKSILVER

It's mercury! Attacks the bones, salivates and makes you sick.

There's no reason why a person should take sickening, salivating calomel when 50 cents buys a large bottle of Dodson's Liver Tone—a perfect substitute for calomel.

It is a pleasant, vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and can not salivate.

Children and grown folks can take Dodson's Liver Tone because it is perfectly harmless.

Calomel is a dangerous drug. It is mercury and attacks your bones. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Dodson's Liver Tone instead and you will wake up feeling great. No more biliousness, constipation, sluggishness, headache, coated tongue or sour stomach. Your druggist says if you don't find Dodson's Liver Tone acts better than horrible calomel your money is waiting for you.—Adv.

Church by Telephone.

Residents on the island of Guernsey, in the English channel, are enabled to listen to church service in their homes any Sunday evening at a charge of about ten cents. Policemen and firemen, as well as lighthouse keepers and other government employees who are prevented by their occupation from going to church, are furnished the telephone service free of charge. At Platte Fougere lighthouse station sometimes as many as eight persons sit down together to hear the telephone service from a church five miles away.

STOP SCRATCHING! RESINOL RELIEVES ITCHING INSTANTLY

That itching, burning skin-trouble which keeps you scratching and digging, is a source of disgust to others, as well as of torment to you. Why don't you get rid of it by using Resinol Ointment? Physicians have prescribed it for over 20 years. In most cases, it stops itching instantly and heals eruptions promptly. It is very easy and economical to use. Sold by all druggists.—Adv.

Correct

Miss Wheat, the new teacher, was hearing the history lesson, which dealt with the career of George Washington. Turning to one of the scholars, she asked:

"James, what was Washington's farewell address?"

The new boy arose with a promptitude that promised well for his answer.

"Heaven, ma'am," he said.

Week's Break-Up-a-Cold Tablets

A guaranteed remedy for Colds and La Grippe. Price 25c of your druggist. It's good. Take nothing else.—Adv.

Dead Humor

After reading the numerous morbid allusions to Philadelphia somnolence, the humorist suggests that Pennsylvania hereafter be referred to as the comatose state.—Michigan Gargoyle.

Cool a burn with Hanford's Balsam. Adv.

Dilemma

Husband—Why don't you put your mind on it and get a good cook?

Wife (sweetly)—I don't think I know how. I don't seem to have any faculty in selecting people to live with.—Life.

GIRL COULD NOT WORK

How She Was Relieved from Pain by Lydia E. Pinkham's Vegetable Compound.

Taunton, Mass.—"I had pains in both sides and when my periods came I had to stay at home from work and suffer a long time. One day a woman came to our house and asked my mother why I was suffering. Mother told her that I suffered every month and she said, 'Why don't you buy a bottle of Lydia E. Pinkham's Vegetable Compound?' My mother bought it and the next month I was so well that I worked all the month without staying at home a day. I am in good health now and have told lots of girls about it."—Miss CLARICE MORIN, 22 Russell Street, Taunton, Mass.

Thousands of girls suffer in silence every month rather than consult a physician. If girls who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion would take Lydia E. Pinkham's Vegetable Compound, a safe and pure remedy made from roots and herbs, much suffering might be avoided.

Write to Lydia E. Pinkham Medicine Co., Lynn, Mass. (confidential) for free advice which will prove helpful.

INVENTORS AT WORK

American Brain Keeps Busy All the Time.

Forty Thousand Patents Issued at Washington Last Year—Some Immensely Valuable Ideas Among Them—Life-Saving Float.

Forty thousand patents were granted by the United States patent office at Washington during 1915, an average of 800 a week. These ranged from duplex voting machines to fishhooks, with a heterogeneous number of wonderfully and mysteriously contrived appliances in between.

Linn Eugene Carpenter of East Orange, N. J., obtained a patent for a new sort of cheese. It has its mass interspersed throughout by committed cherries.

Walter Lindemann of Detroit, Mich., patented a new type of life-saving float calculated to appeal to the submarine-haunted transatlantic traveler of today. Mr. Lindemann's device is a combined mattress and raft and free-lunch counter. The mattress fits into the sleeping berth and is quite comfortable to sleep on. But suppose the ship should be torpedoed! The passenger goes overboard with a removable section of his mattress and finds himself safe for the time being, at least. The mattress is partially filled with cork to make it buoyant. It has a seat for the accommodation of the escaping passenger, and is equipped with a tank of fresh water, cans of food, small electric batteries, an incandescent lamp for signaling at night, a telescopic rod or mast to hoist the lamp at night and a flag by day, and a waterproof, flexible water closure or jacket that can be fastened by a drawstring around the body of the shipwrecked mariner. This keeps him high and dry. Another advantage of this float type of life-saving device is that it is of sufficient buoyancy to support its main occupant and in addition lend possible assistance to others overboard who are not so well provisioned for the emergency.

Then there's the electric umbrella, patented by Frank W. Smithing of Ontonagon, Mich. At first glance it looks like an ordinary umbrella and it is used in the ordinary way. But if the night be dark, just press a button in the handle and the umbrella glows with tiny incandescent electric lights. There are lights at the butt, the top and at the ends of the ribs.

Among other interesting patents issued during 1915 are the following: A talking doll; by pressing the stomach of the doll you cause sounds to issue from the mouth.

A combination penholder and blotter.

A tobacco-pipe filler. The tobacco is contained in the cylinder and the large end of the filler is inserted in the bowl of the pipe. A plunger at the top

New Patent Fly Catcher Which Simply Catches the Fly on the Fly and Blows Him Into a Trap.

is then forced down, thus pushing the tobacco into the pipe.

An under-water operated musical apparatus. A man is lowered into a well, where he plays the horn.

A necktie former. An insect trap. The insect, when passing between the motor on the left, is blown into the trap on the right.

An ornamental design for a "stop, look and listen" sign.

A sanitary shaving brush, having sponge instead of bristles, and having the soap contained in the handle.

A fly-catching machine.

A device for rendering harmless the points of hat or bonnet pins.

A device for fastening button shoes.

Effects on Light.

No influence of any form of attraction on light had ever been noticed until about twenty years ago, when Zeemann showed that a powerful magnet visibly altered the position of certain lines in the spectrum. Now it appears likely that gravitation has a similar, though not the same, effect. Magnetism splits up the spectral lines, exerting a broadening effect, while gravitation shifts them all alike in one direction. For instance, in the solar spectrum, whose rays at their origin have passed through the powerful field of gravity in the sun's vicinity, all the lines appear shifted toward the red, as compared with similar lines from terrestrial light.

Guilty.

"I sentence you to three days' imprisonment," said the judge. "By the way, your face seems familiar. Haven't I seen you before?"

"Yes, your honor," replied the prisoner. "I'm the man who did the interior decorating in your house."

"Ah, yes, now I remember. Did I say three days? Well, just make that sentence three years instead."

MUCH IN A NAME, SOMETIMES

Gouverneur Morris, the Novelist, Slept in Suites When Other Correspondents Didn't.

Private information from the battle-fields of Europe indicates that Gouverneur Morris, the novelist, has had a cinch over the other correspondents.

In many of the hotels the correspondents were herded in one room at night, while Morris had a suite all to himself. Then again Morris was on friendly if not intimate terms with high officials and military commanders, while the other boys had to scrape around as best they could.

It was a mystery to the other scribes to understand how it was that Morris caught on so easily, got the best of everything and went hobnobbing with royalty, until one day a petty officer approached one of the newspaper men and said:

"Will you kindly tell me what state it is that Mr. Morris is governor of?"

The above calls to mind the fact that years ago George William Curtis, editor of the Easy Chair in Harper's Magazine, was in Oberammergau to witness the "Passion Play." Unfortunately he was late in arriving at the open air theater and all the seats except those reserved for high officials were gone. The editor was in despair until he had a bright idea.

Approaching one of the high officials he said:

"Has the duke of Hesse Castle or the duke of Cambridge arrived yet?"

"I think not," the official replied.

"Too bad," the editor remarked, "but when they arrive would you mind telling them that Mr. —, one of the electors of New York, is waiting for them?"

The official bowed and said: "Certainly, sir, but would you not prefer to wait for them inside?"

Mr. Curtis agreed that this arrangement was much to be preferred to the one of standing outside, so he permitted the official to escort him down front and seat him near a bunch of princes, dukes and other assorted specimens of royalty.

"It's a great thing to be an elector of New York," the editor said in telling the story.—From the Editor and Publisher.

Have Healthy, Strong, Beautiful Eyes

REMEDY FOR "ROSY NOSE"

Frequently Careful Chewing and a Pinch of Bicarbonate After Meals Will at Least Help.

If the nose gets very red after eating, or the skin of the face splotches in an unbecoming manner, the patient may be certain that her digestion is out of order. Careful chewing is the first requirement for a cure of this unbecoming flushing, and a little lime-water or a pinch of bicarbonate could be taken after the meal. At all times the lean woman should strive to relax and do things slowly. She should strive to encourage the joyous bee in her bonnet instead of the sorrowful one. She should eat when she is hungry, if it be so often as six times a day, drink plenty of fresh water, take sun baths and sleep in a well ventilated room. When she is on her feet a warm room will be far more conducive to health and plumpness than a cold one, and if she could get a little holiday in a genuinely tropical climate she would be still further benefited. But a quiet spirit and plenty of nourishing food and rest are the essential things, and if these requirements are not considered there is not the least use of going any further. The travelers who take storm and stress along with them will never find the fountain of health and youth, especially if they are the thin sort.

Little Brother Again.

Gertie (who has just been kissed by Arthur under the mistletoe, which he discovered hanging in the hall)—Oh, Arthur, you wicked wretch, to take advantage of me like that! I wish I knew you hung it there; I'd pay them out, that's all.

Arthur (to little brother later in the evening)—Tommy, I'm going to take Gertie away from you soon; will you mind?

Tommy—Not a bit. Sis and I are not friends.

Arthur—And why is that?

Tommy (heedless of Gertie's killing glances)—Oh, she boxed my ears for tipping her off the chair when she was nailing up that mistletoe in the hall.

Sitting on It

Augustine Birrell, the secretary for Ireland, has recently returned home from the war front in France, where he had many interesting and exciting experiences.

Some time ago, while traveling in a third-class railway carriage in the north of England, Mr. Birrell found himself in an amusing although very embarrassing position.

He was only just in time to catch the train and sat down hurriedly next to a little girl in shawl and clogs.

Happening to glance at her a moment or two afterward, he saw that she appeared very uneasy and was regarding him with no great favor.

Then it was that it dawned upon him that he was sitting upon her newspaper.

"Here, my dear," said Mr. Birrell, pulling the paper from under him and handing it to her, "I'm sorry!"

The little girl did not look quite satisfied; but she said nothing till a few minutes later when the train drew up at the station.

"Please, sir," she then inquired, meekly, as she rose to get out, "may I have my fried fish? It was in the paper!"

Treatment of Sores.

Apply Hanford's Balsam lightly and you should find that gradually the sore will diminish in size. The older the case the longer it will take, but it will help the hard cases, after other remedies fail. Adv.

Aladdin an Autoist

"Now," it was explained to Aladdin, "this is a wonderful lamp. Rub it and a genie appears."

"I see little to that. What I want is a lamp that won't go out on my automobile and get me pinched by a traffic cop."—Louisville Courier-Journal.

Methodist Church Notes High School Notes

The pastor will speak Sunday morning on a subject concerning which the whole church should be informed. In the evening service, Mr. Rodeck will speak on "Why I believe in the Sunday-school;" Prof. Snow will discuss the question, "Why I honor the Church;" and Mr. Lloyd will follow with a few minutes' talk on, "Why I preach the Gospel."

We will have special services next week on Wednesday, Thursday and Friday evenings, in commemoration of the events of the Holy Week in the life of Christ. The church will also be open Friday from 12 o'clock, noon, to 3:00 P. M. for devotional purposes. Brief services will be held at 12, at 1, and at 2 o'clock, and a closing service at 3:00. Persons are welcome to enter or leave quietly at any time, but we desire no conversation in the church during those hours.

The Sunday-school board will meet Wednesday evening at the close of the service.

Much satisfaction was evinced by those present at the Roll Call. Of former pastors, letters of greeting were received from Reverends Angwin, Kellog, and Hanson, while Dr. Wythe and his wife were present as usual. Mr. and Mrs. Cook were present, and Mrs. Keith sent a letter. There was an interesting program and Dr. Stephens gave an address.

By the request of the Pastors the business houses have agreed to close "Good Friday" from noon until 3 o'clock, during which time there will be periods of short services in both churches.

Let Me Figure On Your
Well Work

A. B. COVEY
Campbell

Phone 30L
California

C. U. H. S. and Mountain View meet this (Friday) afternoon at 3:30, on the local diamond, in the 2nd I. A. U. game. Admission, 10c.

Wednesday noon, thru the efforts of the Senior Committee on daily exercises, Prof. E. A. Rogers, principal of the Montezuma Mountain Ranch School, was secured to give the students a talk on self-government, of which Montezuma has an almost complete system.

A new plan has been tried in the English classes lately. Every week a pupil from the class is appointed to prepare a program for the class period for Friday of that week. He appoints other members of the class to take part in the program, which consists of debates, readings, and short lectures on present day topics. The plan is meeting with the approval of the students, who are thus relieved of preparing their lessons for that day.

The Student Welfare Committee met Monday afternoon to elect a chairman. Delbert Campbell was the one chosen.

The High School will celebrate the tercentenary of Shakespeare's death on the evening of April 24th. The various classes will present scenes from his plays, and the Glee Club will sing three of his songs, "Hark, Hark, The Lark", "I Know a Bank", and "Who is Sylvia?"

Wednesday afternoon the High ball tossers went to Los Gatos and defeated their nine in the first game of the I. A. U. schedule. Gatos scored twice in the first inning, but our boys came right back in the third and went them one better. After this frame Campbell was never in danger. Pierce held the Gem City boys to no hits until the 6th inning, when Boutan singled. In the 7th, Sproule and Darling got hits, which developed into so-called "home-runs" when the ball rolled thru a wire fence.

Score	R	H	E
Campbell	12	19	6
Los Gatos	5	6	5
